A LITTLE ABOUT US

WHAT'S OURS IS YOURS

Our story began in 1976, when we began designing and manufacturing office furniture. Although we've now grown into one of the largest furniture manufacturers in the world, we still remain an independent, family owned business.

All the things that were important to us in the beginning; our attention to detail, integrity, investment in people and passion for design, are still very much running through the veins of the business today.

OUR BRANDS

We have three global brands within The Senator Group. Each of our brands has its own individual personality, complementing each other to create an extensive portfolio to choose from. Whatever your project, whatever your style and whatever you need, you'll find the solution within this brand family.

Senator

Innovation engineered

Allermuir

Anything but ordinary

Torasan

Beautifully efficient

SHOW AND TELL

This book is an introduction to Senator's portfolio of products and a guide to how you can make each piece your own. Read, research and be inspired, then come and experience the real thing. Comfort can't be chosen from a piece of paper.

thesenatorgroup.com

WE BEGIN BY LOOKING AT YOU

With every Senator design comes a great deal of thought. The design process begins way before pencil reaches paper, beginning with looking at you. We look at how you sit, reach, move and work to create a design which not only looks beautiful, but is a pleasure to use too.

Behind every Senator product is a fusion of intelligent thinking and innovative engineering to create products which support people whether they're focusing, collaborating, presenting or organising.

Section One

ORB DESKING

Orb allows the liberalisation of space through 360 degree circular worktops. We're not talking about simply cutting corners, far from it. Orb's design provides the optimal workspace where it's needed.

006 Orb Desking

NEED IT DIGITAL?

A copy of this book, product rotations, high resolution images, CAD symbols and more detailed product information are all on our website.

thesenatorgroup.com

Orb

A NEW KIND OF DESK... ALL ROUND

Much of human culture in terms of shape and form is round, the same could be said of most structures found in nature.

So why are desks rectangular?

Let's work together

Let's work together

Orb

Work practices have evolved in recent years, focusing less on individuals performing a task at an assigned workstation for a set period of time each day. Today's style of working concentrates more on the importance of the accumulation and sharing of knowledge within a group to achieve results. Orb allows instant ad-hoc configurations between co-workers that can often prove the most insightful. Creating a structure to a space that fosters a fluid working style and an environment that encourages movement and interaction is fundamentally important.

thesenatorgroup.com

STRUCTURE

A cast base and underframe supports a central aluminium extruded column with removable covers to access optional internal cable management facilities.

Modular

Orb is a free-standing circular system ordered as a starter desk with the option of adding a 'bite' circular desk to form a flexible space-saving bench solution.

CABLE TRAY

Horizontal cable channel available in multiple widths to facilitate desk to desk power management

ACCESSORIES POST

Extruded aluminium post allows for the mounting of accessories (screens, monitor arms, power)

UNDERFRAME

Aluminium 4 star underframe supports top

COLUMN

Aluminium extruded column with integrated vertical cable management with lift off covers

BASE

Aluminium 4 star base gives strength and stability

LEVELLING FEET

Levelling feet standard on all leg frame options, offering 15mm adjustment

DESK HEIGHTS

TOP SHAPES

Round starter desk

Bite desk

WIRE MANAGEMENT

Cable management and power / data units are discreetly held in the internal body of the desk column with removable covers for ease of access.

SCREENS

Engineered using an aluminium extruded core structure sandwiched between two foam and fabric faces allowing for a pinnable surface.

ACCESSORIES

CPU HOLDER
Integrated CPU holder solution

LIGHTS
Both twin and single options available

MONITORS
Mounting post for attachment of monitor arms

Accessories Port

Available in low and desk screen height options, the post allows for the fitting of desk top screens, monitor arms, power or lighting solutions.

CONFIGURATIONS

The centralised structure that supports the Orb work surface makes it easy to change the orientation of the workstation, allowing for nested workstations to be easily added or even removed as business needs change or evolve.

STRAIGHT WITH BITE

Section Two

CROSSOVER DESKING

Crossover is a rational and versatile desking range with a visually subtle design. Crossover offers a breadth of finish options, is highly customisable and features a superior fit and finish.

022 Crossover Desking

NEED IT DIGITAL?

A copy of this book, product rotations, high resolution images, CAD symbols and more detailed product information are all on our website.

thesenatorgroup.com

Crossover

THE SKY IS THE LIMIT

Crossover is based around a pair of horizontal beams which provide a robust structure and a continuous fixing method for all furniture elements. Legs, screens, wire management, work surfaces and accessories can be attached at any point along the beams regardless of desk module.

Let's work together

thesenatorgroup.com

Let's work together

thesenatorgroup.com

Crossover

The Crossover beam system allows adjacent workstations to be linked therefore removing redundant structure.

Crossover has been developed to cause minimum impact on the environment, being 100% recyclable at the end of its life and made from 55% recycled materials.

Let's work together

Crossover

UNINTERRUPTED WORKFLOW

Crossover Bench provides a highly flexible solution to suit the needs of the modern office. Optional cable flap access and simple elegant divider screens, have been developed to provide intelligent solutions to cabling and privacy issues.

Optional height adjustable top modules can be specified at any position within the bench to give total flexibility.

thesenatorgroup.com

STRUCTURE

At the heart of Crossover is a small set of intelligent common components. Regardless of workstation type or size, these core components remain the same.

As there are no handed parts, dedicated end or mid-leg sets, the structure can be adapted to cater for any work surface configuration needed!

Flexibility to change

The ability to attach at any point along a beam structure and the flexibility provided by a small set of intelligent components allows Crossover to be changed or added to easily.

SINGLE DESK

SINGLE ROW

DOUBLE ROW

ENDLESS INTERCHANGEABILITY

FLEXIBILITY

The flexibility designed into the structure allows Crossover to provide a comprehensive range of different applications.

Specify

Crossover can be specified as a simple rectangular desk or configured into multi-linked workstation clusters. These can incorporate 90° and 120° pieces. Bench style desking with rectilinear, wave and double wave tops can also be constructed from a common set of components.

DESKTOPS

MEETING ENDS

Crossover Desking

RETURN

Crossover Desking

WIRE MANAGEMENT

Horizontal wire management can be achieved using a basket which hangs directly from the beam structure.

SINGLE HORIZONTAL MANAGEMENT

DOUBLE HORIZONTAL MANAGEMENT

Bring the power!

Any length of basket can be attached giving optimum flexibility when catering for I.T and power solutions.

Solid power!

A heavier duty management solution can be specified which has a solid horizontal tray and a rigid vertical cassette with removable front fascia.

A system specific vertical riser attaches to the cable basket at any point along its length.

Horizontal wire baskets can have fins applied to them in order to gain three-way segregation or simply compartmentalise the space for specific cabling applications.

HEIGHT BLOCKS

Individual worksurfaces can be raised from the standard 730mm high position in 25mm increments by the use of stackable spacer blocks.

Raise it up!

The blocks have been tooled into a profile that allows them to sit onto the beam and stack one on top of another. To raise the worksurface it first needs to be removed and the appropriate amount of spacers added onto the beams.

The worksurface can then be reapplied and fixed to the framework in the standard manner by using the longer fixing bolts that are supplied with the height adjustable kits.

Crossover Desking

HEIGHT ADJUSTABLE LEG

Height adjustable legs can be fitted to individual desks in order that they can be adjusted through a range of 200mm from 680mm to 880mm high

Crank it up!

The adjustment is facilitated by the use of the standard Allen key which engages a weight loaded crank mechanism within the leg. As the mechanism is wound in and out, an inner leg section extends or retracts out of the bottom of the standard leg profile.

Range of adjustment
680-880mm

Crossover Desking

FLIP TOP

The optional flip top function is an alternative way to gain easy access to a large section of the double width cable basket from above the worksurface on standard goalpost legs.

Hidden Access

A cable flap access panel located at the rear of the desk rotates through 90°, creating a void by which the horizontal cable management can be easily reached.

HEIGHT ADJUSTABLE MODULES

Both crank handle and electric height adjustable modules can be specified onto a standard goalpost leg workstation.

Going up!

As the user winds the crank handle, the top raises and lowers in a continuous movement. The worksurface can be raised through a range of 200mm from 730mm to 930mm high, after the user has set the appropriate height they can push the handle back under the worksurface into its stowed position so that it does not restrict their use of the desk.

The electric height adjustable module works via a soft touch pad positioned beneath the front edge of the worksurface, offering 520mm of adjustment; ranging from 730mm to 1250mm.

CRANK HANDLE

Easy turn 'lockable' handle for crank operation

ELECTRIC MECHANISM

Touch control pad for electric operation

Section Three

CORE DESKING

Core is a desking system that offers simplicity through form and function. It can be quickly and easily reconfigured and adapted to suit new demands, regardless of whether these are caused by expansion, reduction or remodelling.

043 Core Workstations

Core

PURE AND SIMPLE

Core is a versatile desk system with a fresh, clean aesthetic based around a horizontal beam construction, which provides structure and rigidity and allows for the fixing of the various system elements. The flexibility designed into the system allows Core to provide a comprehensive range of different applications.

Let's work together

thesenatorgroup.com

Core

Core is available as a four leg desk or a continuous bench using simple, cost effective, flexible components where legs can be shared wherever necessary. Desk screens further enhance the system and are available as a simple pinnable version through to framed system screens with tool rails, fabric and glazing options.

Core

Core has been developed to cause minimum impact on the environment. The product has been designed for a maximum working life and whenever possible reclaimable materials are used.

Core is up to 100% recyclable at the end of its useful life and is made from 55% recycled materials.

STRUCTURE

Core incorporates a splayed leg design which provides the system with a reinforced strength whilst bringing a visual lightness to single and grouped workstations.

UNIVERSAL

Universally sized crossrails for ease of specification, install and reconfiguration

UNIQUE PROFILE

Offers continuous fixing platform

HIGHLY TOOLED

Framework offers a unique, clean aesthetic

SPLAYED LEGS

Provides reinforced strength

LEVELLING FEET

35mm of adjustment

1 SIMPLE

Rolled Steel Structure

The beam system allows adjacent workstations to be linked therefore removing redundant structure. Its inherent strength also allows intermediate legs to be recessed so as not to confine the user's lateral movement.

The ability to attach anywhere along the beam provides the flexibility to position any key furniture element to suit specific functional and ergonomic requirements. This is far more flexible than being confined to predetermined regimented intervals.

Flexibility to Change

The leg frames and structural principle are the same regardless of application or hand and can be assembled and reassembled limitless times without loss of performance.

SINGLE DESK

SINGLE ROW

DOUBLE ROW

CROSS BEAM CONSTRUCTION

ENDLESS INTERCHANGEABILITY

FLEXIBILITY

The flexibility designed into the system allows Core to provide a comprehensive range of different applications.

Specify

Core is a versatile desk system based around a horizontal beam construction, which provides structure and rigidity and allows for the fixing of various system elements. Available as a simple desk or multi-linked workstation cluster, incorporating rectangular, wave, double wave and 120° configurations.

DESKTOPS

MEETING ENDS

WIRE MANAGEMENT

Horizontal wire management can be achieved using a basket which hangs directly from the beam structure.

SINGLE HORIZONTAL MANAGEMENT

DOUBLE HORIZONTAL MANAGEMENT

Bring the Power!

Any length of basket can be attached giving optimum flexibility when catering for I.T. and power solutions.

Solid Power!

A heavy duty wire management solution can be specified which has a solid horizontal tray and a rigid vertical cassette with a removable front fascia.

Horizontal wire baskets can have fins applied to it in order to gain three way segregation or simply compartmentalise the space for specific cabling applications.

A system specific vertical riser attaches to the cable basket at any point along its length.

Let's get into some detail

HEIGHT BLOCKS

Individual worksurfaces can be raised from the standard 730mm high position in 25mm increments by the use of stackable spacer blocks.

Raise it Up!
The blocks have been tooled into a profile that allows them to sit on the beam and stack one on top of another. To raise the worksurface it first needs to be removed and the appropriate amount of spacers added onto the beams.
The worksurface can then be reapplied and fixed to the framework in the standard manner by using the longer fixing bolts that are supplied with the height adjustable kits.

FLIP TOP

The optional flip top function is an alternative way to gain easy access to a large section of the double width cable basket from above the worksurface.

Hidden Access
A hinged section is centrally located at the rear of the top and when closed, forms a seamless part of the worksurface. To open, a scallop at the rear of the flap allows access for your hand to simply pull and rotate the section by a full 180 degrees.
Once open the flap rests on the worksurface and generates a void by which the horizontal wire management can be reached.

Section Four

CHEMISTRY DESKING

NEED IT DIGITAL?

A copy of this book, product rotations, high resolution images, CAD symbols and more detailed product information are all on our website.

thesenatorgroup.com

The Chemistry range of workstations has been developed for modern working environments. Chemistry creates a stylish yet flexible solution which improves productivity and facilitates diversity for individuals and teams.

059 Chemistry / 066 Chemistry Tables /
067 Chemistry Height Adjustable

Chemistry

A NEW DESKING FORMULA

Chemistry Workstations can be configured as individual desks or as bench solutions that share components, allowing for the integration of partitions that form touch down workstations or meeting spaces. The range incorporates two leg styles and the ability to integrate sliding tops for ease of access to integrated cable management.

Let's work together

thesenatorgroup.com

Let's work together

Chemistry

A CATALYST FOR CHANGE

It is widely recognised that the 'one size fits all' approach to office planning is no longer reflective of the way most businesses see themselves working in the future. Chemistry has been designed to incorporate a number of key elements that will facilitate the flexibility and diversity that many architects and clients are looking for.

thesenatorgroup.com

Chemistry

As the modern workplace evolves, there is a declining demand for the 'one size fits all' approach. Instead, workplaces require spaces that are flexible and collaborative, facilities that are efficient and streamlined, combined with an atmosphere that can be both formal and informal.

Chemistry

Chemistry Meeting Tables share the same frame as Chemistry Workstations for a consistent design aesthetic. Options for in desk power and cable management provide practical features for professional environments.

Let's work together

Chemistry

REACHING NEW HEIGHTS

Chemistry incorporates a height adjustable workstation solution allowing the user the option to vary their posture and stand whilst working.

thesenatorgroup.com

Let's work together

Chemistry

Chemistry features a back to back height adjustable bench leg option that allows the user to quickly set their optimum working height by means of a responsive manual adjustment or via a push button electronic mechanism.

thesenatorgroup.com

STRUCTURE

A dual rail structure offering enhanced strength and stability whilst maximising flexible and collaborative working.

Modular

Chemistry is a modular bench system ordered as a starter, or 'add on' desk. Available in back to back or in-line format with options for fixed or sliding tops, standard or 'O' legs.

DUAL RAIL

For enhanced strength and stability

UNIVERSAL

Universally sized crossrails, with inherent adjustment

GO WITH THE FLOW

Levelling feet standard on all leg frame options, offering 50mm adjustment

CHOOSE YOUR STYLE

Settable end leg position to suit user preference. Flush or 5mm inset

Chemistry Desking

DESIGN

The design of Chemistry is a response to the needs of today's office furniture market, where simple elegance and inherent functionality are a must to meet a multitude of demands.

FLOATING TOP

7mm shadow gap creates a 'floating top' aesthetic

'GOAL POST' FRAME

JOINTS

Mitre cut, welded and finished joints, for a neat, clean aesthetic

'O' FRAME

A complete cable management solution facilitates all I.T. requirements, allowing users to specify a system that meets their exact needs.

VERTICAL RISER

MID LEG RISER

DOUBLE RISER

Bring the Power!

Both steel cable trays and wire baskets can be specified in single and double configurations when catering for I.T. and power solutions.

SINGLE BASKET

DOUBLE BASKET

SINGLE CABLE TRAY

DOUBLE CABLE TRAY

Let's get into some detail

Quick Release Mounting Brackets

All double cable management trays and baskets benefit from quick release mounting brackets. The brackets not only allow quick, easy and secure first off installation, but are invaluable in providing a simple method of releasing the tray, allowing it to safely drop.

QUICK RELEASE

HEIGHT BLOCKS

Individual worksurfaces can be raised from the standard 730mm high position in 25mm increments by the use of stackable spacer blocks.

Raise it Up!

The blocks have been tooled into a profile that allows them to sit onto the beam and stack one on top of another. To raise the worksurface it first needs to be removed and the appropriate amount of spacers added onto the beams.

The worksurface can then be reapplied and fixed to the framework in the standard manner by using the longer fixing bolts that are supplied with the height adjustable kits.

Slide...

Incorporating matching aesthetics and modularity, Chemistry can also be specified as a dedicated slide top system.

SLIDING TOP

The optional sliding top function allows easy access to the full length of the double width cable basket

SLIDE GASKET
Dedicated slide gasket, in self lubricating Acetal, for continued ease of operation

OUTRIGGERS
Slide frame outriggers produced from high tensile steel for maximised strength

QUICK RELEASE
Quick release locking mechanism for activating and securing the slide function

HEIGHT ADJUSTABLE

Chemistry Height Adjustable desking is designed to fully interact with the user, whether that be in a seated or standing position.

HEIGHT ADJUSTABLE

Chemistry Height Adjustable desking is available with a fully integrated quick release cable management system along with dedicated screen options.

Section Four

STORAGE & SCREENS

Universal Storage and Screens have been designed as a solution to the changing requirements in the workplace, where personal accessibility of storage and dividers of space are far more important to the active environments of today.

A Little More About Us

OUR SERVICE TO YOU

XPRESS PROGRAMME

Our customers and clients don't always want to wait and why should they? We offer Xpress programmes across all our three brands: **Senator**, **Allermuir** and **Torasan**.

This means some of our most popular products can be ordered and received within 5-10 days depending on the product.

WE LIKE TO SUSTAIN™

As part of our commitment to sustainability, we have our own recycling business called Sustain™.

Through Sustain™ you can access a number of services including the collection and recycling of your waste packaging and recycle or remanufacture of your old furniture.

IT'S ALL IN THE PLANNING

Our sales teams are there to support you in the planning of your project and the interpretation of the client brief. We can assist with space planning concepts using the latest technology that accurately visualises products in an environment. We can also create and supply CAD symbols as required.

A Little More About Us

IT'S YOUR WORKPLACE

WE CALL IT SETTINGS™

Settings™ is a concept we developed at The Senator Group, to enable modern, flexible, efficient and cost effective workplaces for people. Spaces that will facilitate new working practice, enhance collaboration, improve service delivery and act as a catalyst for change.

We understand a great workplace creates a unique identity and culture for an organisation, helping staff recruitment and retention, encouraging collaboration and increasing productivity. It's something that deserves far more consideration than the physical number of people and desks required.

Settings™ is a very clear and simple way to help people understand exactly how spaces can be made as efficient and productive as possible facilitating collaboration at all levels.

CHANGING SPACES

We believe it is possible to segment tasks or spaces into five basic definitions or top level activities; **Work**, **Share**, **Show**, **Source** and **Refresh**.

Settings™ creates a set of common planning tools and supports a more dynamic style of working across many spaces based on behaviours and work styles required. Using a simple block planning approach, Settings™ provides a series of environments that are focused on these task areas and the activity being carried out. This gives individuals the freedom to migrate around the office, utilising the furniture setting that is most relevant to the task being undertaken, as well as embracing technology requirements within the space.

WE CAN ALSO HELP YOU
WITH SEATING, TABLES,
SOFT SEATING, STOOLS...

We've gathered all of our
seating and table collections
to help you complete
your workspace.
